Field plots at UT’s Jackson Ag Research and Extension Center

M.S. Graduate Research Assistantship (GRA)
Crop Physiology and Water Stress
Department of Plant Sciences, University of Tennessee

Location: Coursework will be undertaken in Knoxville, w/ field research required in Jackson, TN

Responsibilities: The University of Tennessee is seeking a M.S. student to conduct crop physiology and water stress research. The primary project focus will be on row crops (incl. soybean, cotton, and corn). We seek a motivated, enthusiastic and conceptually driven individual to work in controlled (greenhouse) and field environments. Experiments will be designed to help understand the impact of environmental changes, including water deficit and heat stress influences on water movement in plants, plant physiological responses, and plant-water-soil interactions. Opportunities for teaching, outreach, and travel to professional meetings will be available.

Students in Plant Sciences at the University of Tennessee are expected to understand and be ethical in the conduct of their research. The successful candidate will have a B.S. degree in agronomy, plant science, or closely related field; should have strong written and oral English skills; will be willing to work with a diverse group of faculty, staff, and students to conduct field and controlled environment (greenhouse and laboratory) research. Interested applicants should be prepared to share their Intellectual curiosity and demonstrate their motivation
and desire to learn on-the-job. Additional highly desirable qualifications that applicants can address in the letter of interest include experience in row crops, strong organizational skills, ability and self-motivation to work independently while accomplishing high quality tasks in a timely fashion.

**Closing Date:** Screening of applicants will begin immediately and continue until filled. Domestic (US Citizen) applicants may have the opportunity to matriculate in Spring 2020 semester, or may be able to undertake summer hourly employment prior to Fall 2020 semester enrollment. International applicants may begin as early as Spring 2020, depending on when complete applications are received.

**Contact:** Please contact Dr. Avat Shekoofa (ashekoof@utk.edu) if interested in this opportunity. Applicants will need to take the GRE and prepare a letter of interest, professional academic biosketch, C.V. and contact information for three references, which will become part of their online application to the UT Graduate School. Information about acceptance into the graduate school at the University of Tennessee can be found at: [www.gradschool.utk.edu](http://www.gradschool.utk.edu)

**The University of Tennessee** is a land grant university with an enrollment of over 27,800. The Plant Sciences Department is located on the Agricultural Campus with lab facilities, greenhouse space, and nearby field space to support active production research. The University of Tennessee also has ten research and education centers which facilitate statewide agricultural research. **Knoxville, Tennessee** is a vibrant community, with a population of approximately 183,270. This community boasts a thriving music and arts scene, along with plenty of opportunities for outdoor adventures in the nearby Great Smoky Mountains National Park.
